

REFERENCE

We're pleased to write a letter of recommendation for the team of BMCC Ltd.

We have known BMCC since they were founded and with part of their team we have worked together even before that.

During that time we have built a partnership and have worked on a number of projects.

We have successfully completed several projects. The last one was involving the design and creation of fabrication drawings for secondary structures (platforms, staircases, etc.) of an industrial plant.

We highly appreciate their professionalism, involvement in the work and responsibility in carrying out the tasks and the deadlines.

Using BIM technologies combined with their experience, redound for the quick and precise design of the steel structures, and consequently their manufacturing and erection.

We recommend BMCC as a trusted and trustworthy partner with a qualified and experienced team to deliver all phases in the design of steel structures.

Sofia, March 2019

PM Engineering Ltd.
